

```

package com.sxt.io;
import java.io.File;
/**
 *
 * @author 江
 *
 */
public class PathDemo01 {
    /**
     * @param args
     */
    public static void main(String[] args) {
        /**
         *      / \   名称分割符   separator
         */
        String path="D:\\workspace\\IO_study01\\IO.png" ;
        System.out.println(File.separatorChar);
        //建议
        //1. /
        path="D:/workspace/IO_study01/IO.png";
        System.out.println(path);

        //2.   常量拼接

        path="D:"+File.separator+"workspace"+File.separator+"IO_study01"+File.separator+"IO.png";
        System.out.println(path);

    }
}

```
