

```
package com.sxt.others;

/**
 * InheritableThreadLocal:继承上下文 环境数据 拷贝一份给极线程
 * @author DELL
 *
 */

public class ThreadLocalTest04 {
    private static ThreadLocal<Integer> threadLocal=new InheritableThreadLocal<>
();
    public static void main(String[] args) {
        threadLocal.set(2);
        System.err.println(Thread.currentThread().getName()+"--
>" +threadLocal.get());

        //线程由main线程开辟
        new Thread()->{
            threadLocal.set(3);
            System.err.println(Thread.currentThread().getName()+"--
>" +threadLocal.get());

        }).start();
    }
}
```
