

```
package com.sxt.factory.abstractFactory;

public interface Engine {
    void run();
    void start();
}

class LuxuryEngine implements Engine{

    @Override
    public void run() {
        System.err.println("转得快！");
    }

    @Override
    public void start() {
        System.err.println("启动快！ 可以自动启停！");
    }
}

class LowEngine implements Engine{

    @Override
    public void run() {
        System.err.println("转得慢！");
    }

    @Override
    public void start() {
        System.err.println("启动慢！ 可以自动启停！");
    }
}
```
