

```

package com.sxt.thread;

/**
 * lambda推导
 * @author 江
 *
 */
public class LambdaTest10 {
    public static void main(String[] args) {
        ILike like =new Like();

        like.lambda();

        like=new ILike() {
            @Override
            public void lambda() {
                System.err.println("I");
            }
        };
        like.lambda();

        //lambda 有参数可以加入括号中，并且括号可以省略
        like=()->{
            System.err.println("like");
        };
        like.lambda();

    }
}

interface ILike{
    void lambda();
}

class Like implements ILike{
    @Override
    public void lambda() {
        System.out.println("I like lambda");
    }
}

```
