

```
package com.jiang.ThreeTierSample.service;

import com.jiang.ThreeTierSample.dao.StudentDao;
import com.jiang.ThreeTierSample.entity.Student;

//业务逻辑层:逻辑性的增删改查(增: 查+增) , 对dao层进行的组装
public class StudentService {
    StudentDao studentDao=new StudentDao();

    public boolean addStudent(Student student){
        if(studentDao.isExist(student.getUno())){//表示此人已经存在
            System.out.println("此人已经存在!");
            return false;
        }else{
            studentDao.addStudent(student);
            return true;
        }
    }
}
```
