

```
package com.jiang.tag;

import javax.servlet.jsp.JspException;
import javax.servlet.jsp.tagext.TagSupport;

public class MyIteration extends TagSupport {
    private int num; //执行次数

    public void setNum(int num){
        this.num=num;
    }

    @Override
    public int doStartTag() throws JspException {
        return EVAL_BODY_INCLUDE; //先执行一次
    }

    @Override
    public int doAfterBody() throws JspException {
        num--;
        return num>0? EVAL_BODY_AGAIN:SKIP_BODY; //后执行一次
    }

    //执行完毕后
    @Override
    public int doEndTag() throws JspException {
        return super.doEndTag();
    }
}
```
