

```
package com.sxt.factory.factoryMethod;

public class Client {
    public static void main(String[] args) {
        Car c1=new AudiFactory().creatCar();
        Car c2=new BydFactory().creatCar();

        c1.run();
        c2.run();
    }
}
```
