```
package com.sxt.adapter;
/**
 * 用户端类
 * @author 江
 */
public class Client {
     public void test01(Target t) {
         t.handleReq();
     }
     public static void main(String[] args) {
                Client c=new Client();
                Adaptee e=new Adaptee();
//
                Target t=new Adapter01();
                Target t=new Adapter02(e);
                c. test01(t);
        }
}
```
