```java
package com.sxt.mediator;

public class Finacial implements Department{
    private Mediator m;

    public Finacial(Mediator m) {
        this.m=m;
        m.register("finacial", this);
    }

    @Override
    public void selfAction() {
        System.err.println("数钱");
    }

    @Override
    public void outAction() {
        System.err.println("汇报工作！钱太多了，数不完！");
    }

}
```
