```java
package com.sxt.syn;
/**
 * 线程不安全：数据有负数，相同
 * @author 江
 *
 */

public class UnsafeTest1 {
    public static void main(String[] args) {
        //一份资源
        UnsafeWeb12306 web=new UnsafeWeb12306();
        //多个代理
        new Thread(web,"码畜").start();
        new Thread(web,"码农").start();
        new Thread(web,"码蝗").start();
    }

}

class UnsafeWeb12306 implements Runnable{
    //票数
        private int ticketNums=10;
        private boolean flag=true;
        @Override
        public void run() {
                while(flag) {
                        test();
                }

        }

        public void test() {
                if(ticketNums<0) {
                        flag=false;
                        return;
```

```
            }
            try {
                    Thread.sleep(200);
            } catch (InterruptedException e) {
                    e.printStackTrace();
            }
            System.err.println(Thread.currentThread().getName()+"--
>"+ticketNums--);
        }

}
```
