```java
package com.sxt.mediator;

public class Development implements Department{
        private Mediator m;    //持有中介者(总经理)的引用

        public Development(Mediator m) {
                super();
                this.m = m;
                m.register("development", this);
        }

        @Override
        public void selfAction() {
                System.err.println("中心科研,开发项目!");
        }

        @Override
        public void outAction() {
                System.err.println("汇报工作！没钱了，需要资金支持!");
        }
}
```
